

BOSQUES PICO BONITO AND FOREST CARBON MARKETS

Lecture by
Robert L. Lapedes
CEO, Bosques Pico Bonito

Wednesday, November 4, 2009 at 5:00 p.m.
FIU Modesto A. Maidique Campus
Wertheim Conservatory

Robert L. Lapedes holds an MBA and a BS from Babson College. He is an investor and principal architect of the Pico Bonito, LLC business model and financing structure. Pico Bonito, now in its fourth year of operation, is a pioneer in blending successful models to achieve environmental, social, economic, financial, and investment objectives - focusing on sustainable forestry, agro-forestry, and the carbon offset market. Pico Bonito promotes sustainable livelihoods by strengthening community participation in resource management. It accomplishes this through the establishment of precious tropical hardwood plantations that not only repair, and sustainably manage previously degraded habitats around the fragile areas of the Pico Bonito National Park in La Ceiba, Honduras, but also achieve market rate financial returns for its socially and environmentally responsible investors.

Event is free and open to the public.
