

# Global Energy Security Forum

“Advancing Energy Security and Sustainability through  
Diversification and Efficiency”

## The Global Energy Outlook to 2030

What is the Global Energy context within which the world will be implementing its new energy policies and measures to address global warming?

Join us for a special presentation by guest speaker, Scott Nauman, Manager for Economics and Energy in the Corporate Planning Department of ExxonMobil. Mr. Nauman will present the Global Energy Outlook, which includes an assessment of energy supply and demand through 2030. He will also discuss the link between economic progress and energy consumption, and examine the underlying factors that are shaping important energy supply and demand challenges around the world. The Energy Outlook will also cover renewables, growing power generation and transportation demands and reduction of CO<sub>2</sub> emissions.

Join us for a light Lunch at 12:00 p.m. following the presentation.
