Steven J. Green
School of International
& Public Affairs

INVEST IN THE CHANGEMAKERS OF TOMORROW

As one of the world's largest and most respected schools of its kind, the Steven J. Green School of International & Public Affairs at Florida International University (FIU) educates more than 4,800 students across eight academic departments and 38 degree programs, spanning the social sciences and the humanities. These future leaders are addressing some of the world's most pressing challenges through interdisciplinary education and training, equipping them to make tangible impacts on communities locally and globally.

Representing 120+ countries and speaking 50+ languages, our students engage with leading scholars and practitioners, gaining real-world experience at every level.

Thanks to philanthropy and state funding, the west wing of the Green School opened its doors in 2023, uniting departments and research centers in a state-of-the-art academic environment. Yet one vital piece remains incomplete: A home for the Public & Economic Policy Innovation Hub.

PUBLIC & ECONOMIC POLICY INNOVATION HUB

The Public & Economic Policy Innovation Hub will unite two vital FIU programs—the Jack D. Gordon Institute for Public Policy and the Department of Economics—on the currently incomplete fourth floor of the Green School's west wing. Your support will help complete this space, enabling these programs to create an innovative environment where expertise in public policy and economics intersects. The hub will foster interdisciplinary research, collaborative problem-solving and talent development, uniting economic modeling with real-world policy design to address local, national and global challenges.

This is your chance to give back and build the spaces where students learn and research thrives.

A PLACE TO CULTIVATE STRATEGIC TALENT

Through integrated academic programs, experiential learning environments and active engagement with government, industry and global partners, the hub will serve as a dynamic engine for generating solutions and shaping policy. It will prepare leaders to navigate the forces redefining the twenty-first-century world while cultivating strategic talent and fostering partnerships committed to sustainable, secure and prosperous futures.

Opportunity to Name Here

“This space is designed not just for today’s scholars, but for tomorrow’s strategists.”

— Shlomi Dinar, Dean

STATE-OF-THE-ART FACILITIES TO ADVANCE RESEARCH AND TRAINING

Anchoring the hub are two state-of-the-art facilities, the Cyber Policy ThinkSpace and the Security Research and Training Lab.

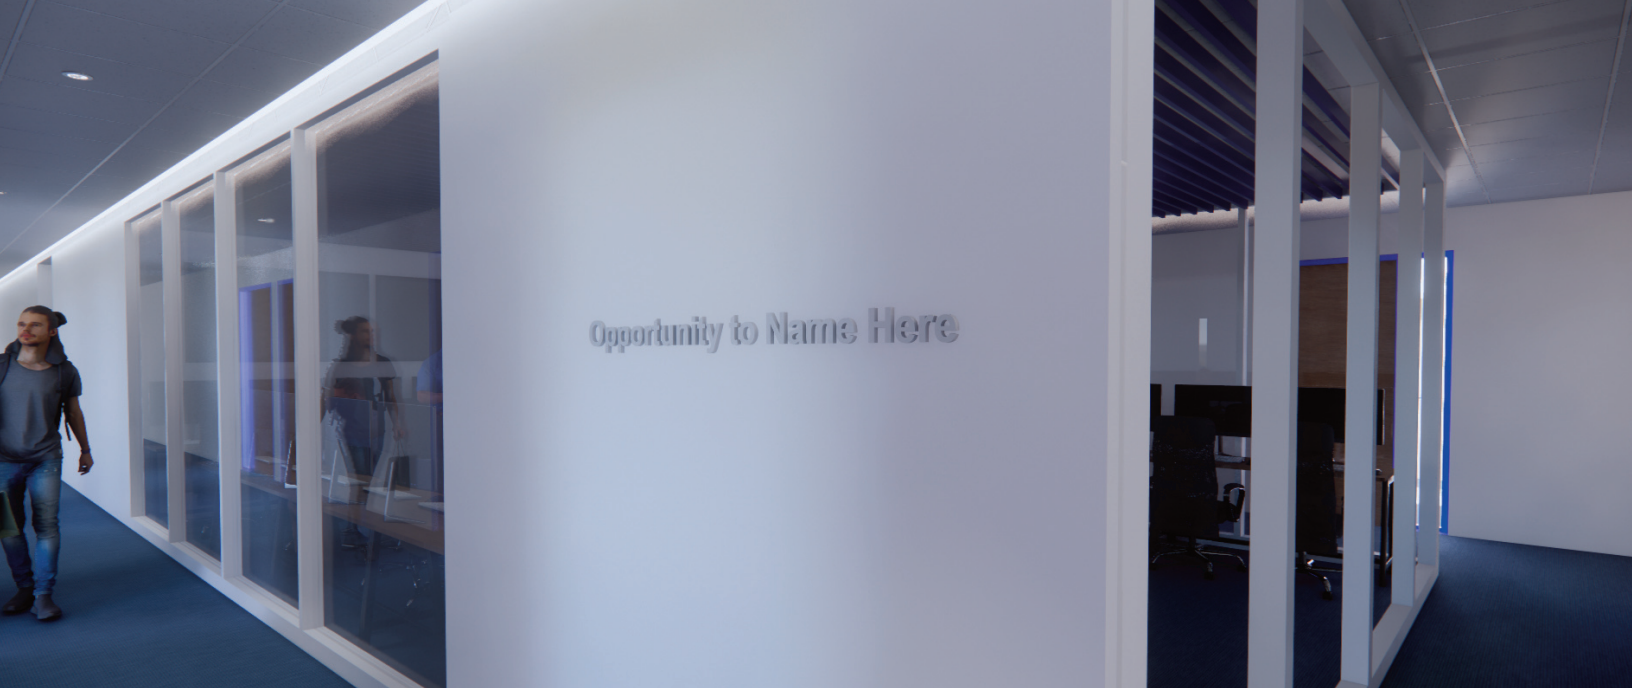

CYBER POLICY THINKSPACE

The Cyber Policy ThinkSpace serves as a hybrid convening environment for workshops, policy simulations and executive training with public- and private-sector leaders, providing a collaborative venue for hands-on exercises and real-time scenario testing of cyberterrorism, transnational crime, technology governance and critical infrastructure protection.

SECURITY RESEARCH AND TRAINING LAB

The Security Research and Training Lab supports rigorous analysis of open-source data on issues such as economic security challenges, supply-chain resilience, national security threats, human trafficking, and environmental risks. It enables students, faculty, and resident fellows to conduct joint research and translate complex global challenges into actionable policy strategies.

YOUR INVESTMENT SHAPES THE FUTURE

Building a cutting-edge home for the Public & Economic Policy Innovation Hub will ignite a new era of innovation, research, training and policy leadership at FIU. Whether you are a foundation, philanthropist or industry leader, your support helps advance policy-focused research and develop a workforce that understands the intersection of economics and public policy—preparing future professionals to deliver data-driven solutions to complex global and societal challenges. With your partnership, we can accelerate meaningful solutions and empower the next generation of experts who will navigate—and define—the future of our world.

YOUR SUPPORT WILL HELP US:

- **Build** a strategic hub that merges data-driven analysis with real-world decision-making.
- **Advance** cyber and security innovation through state-of-the-art facilities.
- **Develop** global talent equipped with interdisciplinary skills, cultural fluency and hands-on experience.
- **Strengthen** workforce pipelines that serve government, industry, nonprofits and international partners.
- **Drive** impactful research that addresses critical global challenges.
- **Create** a more secure, prosperous future for communities locally, nationally and globally.

Recognition opportunities are available!

This is your moment to help shape the future of public policy education.
